1Source for
Audio, Web & Video
Conferencing

Web-Pro combines the simplicity of the telephone with the power of the internet to deliver reservationless, fully-integrated audio and web conferences. Conduct high-impact, interactive and productive real-time meetings with remote participants anywhere, anytime, directly from your desktop.

APPLICATIONS:

With Web-Pro's robust suite of conferencing tools make any meeting with remote colleagues, customers and partners more interactive and productive.

ROUTINE MEETINGS

» Save travel time and expense by conducting routine business meetings with Web-Pro. Automated polling and voting facilitate decision making and problem solving. Make animated Microsoft Power Point presentations part of your meetings to add interest and promote retention of important information.

SALES DEMONSTRATIONS

» Dramatically shorten the sales cycle for any computer-based products by demonstrating them to your prospects in real time! Ideal for software companies and other technology firms.

WORKGROUP COLLABORATION

» From simple document modification to complex software development, Web-Pro's Application and Desktop Sharing tools allow you to collaborate with remote colleagues as though they were in the same conference room.

TRAINING SESSIONS

» Use Web-Pro's Quizzing and Testing tools to define questions and assess participants progress with real-time automated score calculations.

TROUBLESHOOTING

» Use Web-Pro to take control of a remote participant's computer to diagnose and solve computing problems.
