Conferencing*

Take your conferencing to the next level with *Insta-View*.

In today's fast-paced business environment, making travel decisions quickly and efficiently is critical to maintaining a competitive advantage.

Time wasted scheduling in-person meetings, making travel arrangements and bringing together a globally dispersed team can mean lost revenue and increased operating costs. Every minute counts.

With Insta-View web conferencing, you can increase effectiveness and productivity across your entire company—and make faster, more accurate business decisions every day. Collaborate with employees, customers and business partners-anytime, anywhere.

Insta-View integrates data, voice and video content within a standard web browser, so you can conduct real-time meetings over the internet—simply and quickly.

APPLICATIONS:

- » Present slides to make your meeting more memorable
- » Conduct sales presentations or training sessions
- » Share your latest sales and financial projections
- » Collaborate on product plans and design specifications
- » Annotate technical documents
